---

## EDUCATION

---

### Waltham High School

May, 2022

*High school Diploma*

*Waltham, MA*

- AP Computer Science Principles & AP Computer Science A
  - introduced to fundamental computer science principles through the Java programming language. covered topics such as object-oriented programming, algorithms, data structures, recursion, and problem-solving.

## PROJECTS

---

### Freelance Developer

January 2024

- Developed and implemented a responsive and user-friendly company website for a construction company using HTML, CSS, Bootstrap library, and Javascript.
- Applied a client-focused approach, translating business requirements into a visually appealing and functional web presence.

### Background Generator

December 2023

- Web development project built with HTML, CSS, and Javascript.
- User-friendly tool featuring an interactive color wheel for easy gradient customization. Tool allows you to witness real time previews, and once satisfied, effortlessly copy the generated linear gradient code for seamless integration into your web development project.

### Blackjack game

March 2022

- This Java project implements a simple console-based blackjack game with a card constructor class, deck constructor class, main class, and a suit class.
- The Card class represents playing cards with attributes for rank and suit, the suit class defines the possible suits, and the Deck class manages a deck of cards, including methods for initialization and shuffling. The blackjack game's main class orchestrates the gameplay, allowing the user to input actions like hitting or staying in a loop until the game concludes.
- The game includes basic functionalities such as dealing cards, determining winners, and prompting users to play again, providing a fundamental structure for a blackjack experience with user interaction and card manipulation.

## WORK EXPERIENCE

---

### Pure Solutions - Turf Care Technician

Feb. 2023 – Present

- Experienced Organic Turf Care Specialist with a focus on precision services such as lawn seeding, aeration, organic fertilizer application, grub control, and compost spreading.
